# **ADJUSTMENT PROCEDURE**

## **ADJUSTMENT CHARGE TO CUSTOMER**

If any tire covered by this policy becomes unserviceable during its full original tread life, because of a road hazard, the servicing dealer will make an allowance on the adjustment price of a comparable new Eldorado tire. The replacement charge will be based on the tread depth remaining on the tire. The customer is responsible for mounting, balancing and any applicable taxes.

A tire has delivered its full original tread life when worn down to the treadwear safety indicators molded into the tire, which means a tire with only 2/32 of tread remaining is considered worn out. No cash refund will be made.

After checking the chart to determine the original 32nds of tread on a new tire of the same type, measure the tire to determine the remaining tread depth. Subtract the remaining tread depth from the beginning tread depth to give the number of 32's of depth used. Multiply the 32nds used times the charge per 32nd per the chart. This should be the charge the customer pays for the replacement tire plus applicable mounting, balancing and any applicable taxes.

## **CREDIT TO DEALER**

Your credit will be determined by taking your current cost of the equivalent replacement tire less the charge you should have collected from the customer as noted above. When the customer charge is in excess of your replacement cost the credit will be zero. Please note an equivalent tire must be purchased.

# ROAD HAZARD ASSISTANCE

**ROAD HAZARD ASSISTANCE** - Recognizing that it is sometimes difficult to avoid obstacles in the road such as, glass, chuck holes, etc., that can cause damage to the tire to the extent that it is non-repairable and no longer serviceable, this assistance is meant to help.

## **WHAT IS COVERED?**

All ELDORADO BRAND Radial Passenger and Radial Light Truck tires are covered under the Road Hazard Assistance Program.

### **Exceptions**

In some lines, to cover a size, Tire Associates makes available a neutral tire. These tires are not ELDORADO BRANDED and therefore are not covered under the Road Hazard Assistance.

## **HOW IS IT COVERED?**

All tires adjusted under the Road Hazard Assistance Program will use a "Road Hazard Adjustment Charge" on a comparable ELDORADO replacement tire.

## **THIS ROAD HAZARD ASSISTANCE EXCLUDES:**

repairable punctures, worn out or run flat tires, irregular tread wear, willful damage or abuse, and damage due to tire chains, fire, wreck or collision, tubes, out of round or bent wheels, defective brakes, shocks, steering and improper alignment damage. Tires which have been used on any commercial vehicle or any car used for competitive purposes such as races, rallies or time trials are also excluded.

## **HIGH PERFORMANCE**

Speed rating no longer applies to an ELDORADO produced tire that has been altered as determined by Tire Manufacturers. Always follow accepted repair methods and use proper materials, as recommended by Tire Manufacturers.

Any replacement under these policies does not include charges for local sales tax, nor dealer services such as mounting and wheel balancing — such additional charges, if any, will be borne by the customer.

These policies do not, in any way extend to consequential damage resulting from either workmanship or material related condition or road hazard damage.

No representative has authority to make any representation, promise, or agreement except as stated herein.

## **EXCLUSION OF WARRANTIES:**

It is agreed that the seller makes no warranties, express or implied, and no representations, promises, or statements to the buyer with reference to the goods covered by this agreement. It is expressly understood that all warranties, express or implied, are between the manufacture and the buyer. The seller shall not in any case be liable to the buyer for consequential or incidental damages of any kind whether for defective or nonconforming goods, breach or repudiation of any term, or condition hereof, or otherwise.
